

The eyes had it  
 by De Lorenzo

**'A' FOR EFFORT**  
 How to attack under-eye  
 averageness? Arm  
 yourself with an eye  
 cream formula spiked  
 with that anti-ageing ace,  
 vitamin A. Pigmentation  
 is slowly pulverised,  
 cellular turnover and  
 collagen production are  
 given a purposeful prod.  
 You can actually feel this  
 baby getting to work.

**SUPERCOLOURFRAGILISTIC**  
 If 2011 is a colour, it's honeysuckle. So say the people  
 at the Pantone Color Institute. Why it won colour of  
 the year? It gets the adrenaline going, instils confidence,  
 courage and spirit. Ours is lifted at the sight of this  
 NARS limited edition featuring one of our five pink  
 polishes, Shiap, the Angelika Lip Gloss and new  
 Multiple shade, Angelika. NARS Tinted Love, \$135 (1800 007 894)
